

This scraper is implemented in Python 3.7.3. Please also have the BeautifulSoup ($\geq 4.9.0$) package installed prior to running the scraper. For the extra credit parts, please have Matplotlib and NetworkX installed as well.

```
[Mirandas-MBP:fa20-cs242-assignment2 mirandaliu$ python3 main.py -h
usage: main.py [-h] --url  [--nbook] [--nauthor]
```

CS242 Assignment 2 User Inputs.

required arguments:

--url URL to begin.

optional arguments:

--nbook Number of books to scrape.

--nauthor Number of authors to scrape.

Mirandas-MBP:fa20-cs242-assignment2 mirandaliu\$ █

Direct to the working folder, and in your terminal, please run **python3 main.py -h** to look at all options for running the scraper. You should be asked to give an url of a book to begin with. The parameters nbook and nauthor to scrape are optional.

An example to run the scraper with *Clean Code: A Handbook of Agile Software Craftsmanship* would be:

python3 main.py --url <https://www.goodreads.com/book/show/3735293-clean-code>

After the scraper has finished running, there should be two files generated: book.json & author.json:

```

```

To run the extra credit part, use the following command after you have done the above scraping:

python3 extra.py

This should generate a figure like the one below:
